 Pawan 

PROFILE

Full-Stack Developer specializing in MERN stack development and intelligent automation. Proven track record in building scalable, role-based web applications that integrate OCR technology for workflow automation. Passionate about bridging complex operational challenges—such as vehicle lifecycle management and academic project tracking—with clean, intuitive, and high-performance digital solutions.

TECHNICAL PROJECTS

02/2026 – Present

SnapReminder: Smart Reminder & Collaboration System, *Final year Project*

- Co-developed a project management platform utilizing the MERN stack to improve student team collaboration and project discipline.
- Built an OCR-assisted reminder engine that converts timetable images into actionable, priority-based tasks, reducing manual data entry.
- Secured application endpoints using **JWT authentication** and implemented automated web/email notification triggers via **Nodemailer**.
- Designed a modular architecture for circle/group management, including collaborative feed updates and invitation workflows.

08/2025 – Present

AutoFlow: Vehicle Lifecycle Management System, *Final year Project*

- Engineered a centralized, full-stack platform to automate vehicle lifecycle tasks, significantly reducing human error in compliance and maintenance tracking..
- Integrated **Tesseract.js** to perform OCR on uploaded documents, enabling automated extraction of PUC and insurance expiry dates.
- Developed a dynamic dashboard featuring real-time data visualization of fleet compliance scores and predictive maintenance suggestions.
- Implemented role-based access control (Admin, Manager, Driver) to ensure secure data handling and efficient fleet oversight.

EDUCATION

07/2023 – 2026
Ahmedabad

BACHELOR OF COMPUTER APPLICATIONS (BCA), *JG University*
Expected Graduation: 2026

2021 – 2023
Ahmedabad

HIGHER SECONDARY SCHOOL, *Pratap high school*

TECHNICAL SKILL

Core Stack (MERN)

MongoDB, Express.js, React.js, Node.js.

Tools & Utilities: Git/GitHub, Postman, draw.io, VS Code.

Tesseract.js

AI/Integration: (OCR for image-to-text extraction), API Integration, JWT Authentication.

Front-End: JavaScript (ES6+),

Tailwind CSS, HTML5, CSS3, Bootstrap.
